

# Culture Change Tools™ Facilitator Certificate Program

CCC's Safety Culture Tools™ Facilitator Certificate Program trains and licenses internal facilitators to become qualified resources to conduct the same proprietary Safety Culture Tools™ developed by Dr. Steve Simon, Ph.D. and implemented successfully in companies throughout the US and North America.

Whether employed at the workgroup/team level, site, business unit or enterprise-wide, Dr. Simon's culture-based tools are proven to engage employee groups to identify key cultural factors that influence unsafe acts, and solicit input and solutions from those with the greatest risk.

The Tools Facilitator can be a manager, a supervisor, a specialist, or frontline worker who possesses the skills to help others understand and apply safety culture concepts, keep group discussions on track and promote the development of action plans to achieve and sustain a positive safety culture.

## METHOD AND MODULES

- One two-hour module *per tool* is conducted virtually.
- Multiple tools can be combined into one workshop.
- Following certification, participants will receive an individual licensed PowerPoint file to use within their company. \*

## WHO SHOULD ATTEND

Certification is available to all levels of employees: frontline workers, supervisors and managers.

## CULTURE CHANGE TOOLS™ AVAILABLE FOR LICENSE \*

- ✓ Culture Iceberg®
- ✓ Changing Norms®
